## Cybersecurity Challenges Faced By All Industries (Especially Healthcare)

Cyberattacks are a common threat to many industries, especially those that deal with sensitive information and data. These best practices, that include using a robust IAM solution, will help protect companies in your industry, including healthcare.

While cybersecurity attacks are a huge issue for any industry and organization, they're extremely detrimental to healthcare organizations, often resulting in the inability to provide effective patient care.

The Top 10 Reasons for the Virtual Identity Server

Virtual Directories, such as Optimal IdM's Virtual Identity Server (VIS), are very helpful whether it's for unifying separate data directories, linking disparate directories after a merger/acquisition; or even to reduce data latency. A virtual directory can also reduce security risks by moving less authorization around the enterprise. Download the whitepaper to learn more!

CIAM - The Best Thing You Can Do for Your Customers That They'll Never Notice

CIAM addresses issues around customer expectations, performance and scalability, customer data integration, fraud prevention, and security. Unlike IAM, CIAM is designed to please customers and control access in a way that is transparent, customizable, and secure. It's focus is on how a customer feels about the company they are buying from.

Identity Fabrics and the Evolution of Identity

An Identity Fabric solution supports stronger cybersecurity by enabling the consistent enforcement of policies across infrastructures, and across distributed apps as well, while also making advanced identity controls such as multi-factor authentication (MFA) and passwordless authentication easier to implement.

Watch The Webinar

Why You Need Cloud Hosted Virtual Directory Services

This presentation will discuss the benefits of cloud hosted virtual directory services and provide use cases of how the Optimal IdM team deploys, hosts, manages & monitors their signature virtual directory product, the Virtual Identity Server, in a cloud environment.
